

World's first 90 minutes safety storage cabinets with FM Approval

Gründau, January 5th 2016 – asecos – the leading German manufacturer of highly-insulated safety storage cabinets for flammables – presents the safety cabinet Q-CLASSIC-90, now approved and certified according to FM standards.

Safety storage cabinets with 90 minutes fire resistance offer protection at the highest stage – perfectly suitable for remote locations without quick access to fire-fighting emergency services.

In addition asecos safety storage cabinets also meet European Standards – EN 14470-1 and 14727 and the "GS" mark guarantees robust construction and longevity. The Q-CLASSIC-90 offers a number of advantages: self-closing wing doors in the event of fire, secure cylinder locking and ventilation possibilities.

The selectable interior provides an excellent opportunity to individualize the laboratory equipment. With height adjustable shelves, drawers to maximize storage capacity or metal-free interior equipment – ideal for storage of flammable, aggressive hazardous substances – the Q-CLASSIC-90 offers many combinable features.
