

Indoor or outdoor: Safe and approved storage of flammable and toxic gases

Gründau, April 1st, 2016 – Are you storing compressed gases indoors? Once you have understood guidelines within the DSEAR Regulations 2002, HSG51 and HSG71, once you know the risks associated with your gases at your site, asecos has a solution for gases stored indoors and in use.

With cabinets from 60 cm up to 140 cm wide asecos has a solution for up to four 50 litre gas cylinders. The cabinets are complimented with cylinder retainers, rolling ramps and mountings for regulators and connections. The G-ULTIMATE-90 cabinets also offer maximum safety up to 90 minutes fire resistance. The cabinets are manufactured to EN 14470-2 and tested and certified in accordance with the tightened GS regulations.

Are you storing gases outdoors?

No problem for the asecos safety storage cabinets G-OD for the storage of pressurised gas cylinders in outdoor areas according to TRGS 510.

The G-OD characterized by a maximum storage volume for up to five 50 litre compressed gas cylinders. The robust and completely galvanised sheet steel construction offers a perfect high-quality construction. Additionally they consist of mounting rails for regulators and connections, rolling ramps and cylinder retainers. Options available include viewing windows for added security.
